Code Blame

```python
import json
from datetime import datetime

# File to save tasks
TASKS_FILE = "tasks.json"

# Load tasks from file
def load_tasks():
    try:
        with open(TASKS_FILE, "r") as f:
            return json.load(f)
    except FileNotFoundError:
        return []

# Save tasks to file
def save_tasks(tasks):
    with open(TASKS_FILE, "w") as f:
        json.dump(tasks, f, indent=4)

# Display tasks
def show_tasks(tasks):
    if not tasks:
        print("\nNo tasks found.\n")
        return
    print("\nYour Tasks:")
```

Task 3 : Platforms

📌 Platforms Used

- Github
- Canva

🖼️ Activity Proof

Screenshots have been included to demonstrate the activities performed on each platform. On GitHub, a repository was created and project files were organized into folders. On Canva, a presentation on digital literacy was designed and edited.

🧠 Notes

Through this task, I learned how different digital platforms can be used for different purposes. GitHub helped me understand project management, file organization, and version control, while Canva allowed me to create visually appealing presentations.

I also gained practical experience in using these tools effectively for academic work.

✅ Conclusion

This task enhanced my digital literacy skills by providing hands-on experience with important online platforms used for content creation and project management.
